GUIDELINES AND CODE OF ETHICS TO CHECK MALPRACTICES AND PLAGIARISM IN RESEARCH

The purpose of this set of guidelines is to provide a positively oriented set of practical suggestions for maintaining integrity in research. Not only does the ethical conduct of science satisfy a scientific moral code, it also leads to better scientific results. Because, the adherence to ethical research practice leads to more attention to the details of scientific research including qualitative analysis, quantitative & statistical techniques and to more thoughtful collaboration among investigators. Also, the credibility of science with the general public depends on the maintenance of the highest ethical standards in research. Observance of these guidelines will help an investigator avoid departures from accepted ethical research practice and prevent those most serious deviations that constitute research misconduct. Research misconduct is defined as fabrication, falsification, or plagiarism including misrepresentation of credentials in proposing, performing, or reviewing research or in reporting research results. It does not include honest error or differences of opinion. Misconduct as defined above is viewed as a serious professional deviation that is subject to sanctions imposed both by the University by many professional associations and in the case of funded research, the respective funding agency. These guidelines can be used as a common repository of generally accepted practice for experienced researchers and as an orientation to those beginning research careers. These principles apply to fields of scientific research, social and behavioral sciences that involve collection and interpretation of data. When in doubt about the accepted ethical standards in a particular case, a researcher should discuss the matter on a confidential basis with another respected colleague, Institutional Ethics Committee or the Director/Dean of Institute.

MATTERS OF ETHICAL CONCERN IN RESEARCH

1. Plagiarism

Authors who present the words, data, or ideas of others with the implication that they own the same, without attribution in a form appropriate for the medium of presentation, are committing theft of intellectual property and may be guilty of plagiarism and thus of research misconduct. This statement applies to reviews and to methodological and background/historical sections of research papers as well as to original research results or interpretations. If there is a word-for-word copying beyond a short phrase or six or seven words of someone else's text, that section should be enclosed in quotation marks or indented and referenced, at the location in the manuscript of the copied material, to the original source. The same rules apply to grant applications and proposals, to clinical research protocols, and to student papers submitted for academic credit. Not only does plagiarism violate the standard code of conduct governing all researchers, but in many cases it could constitute an infraction of the law by infringing on a copyright held by the original author or publisher. The work of others should be cited or credited, whether published or unpublished and whether it had been written work, an oral presentation, or material on a website. One need not provide citations, however, in the case of well-established concepts that may be found in common textbooks or in the case of phrases which describe a commonly-used methodology. Special rules have been developed for citing electronic information.

KHAMMAM - 507 002.

2. Use and Misuse of Data

Research integrity requires not only that reported conclusions are based on accurately recorded data or observations but that all relevant observations are reported. It is considered a breach of research integrity to fail to report data that contradict or merely fail to support the reported conclusions, including the purposeful withholding of information about confounding factors. If some data should be disregarded for a stated reason, confirmed by an approved statistical test for neglecting outliers, the reason should be stated in the published accounts. A large background of negative results must be reported. Any intentional or reckless disregard for the truth in reporting observations may be considered to be an act of research misconduct.

3. Ownership of and Access to Data

Research data obtained in studies performed at the institute by employees of the institute are not the property of the researcher who generated or observed them or even of the principal investigator of the research group. They belong to the institute, which can be held accountable for the integrity of the data even if the researchers have left the institute. Another reason for the institute's claim to ownership of research data is that the institute, not the individual researcher, is the grantee of sponsored research awards. Reasonable access to data, however, should normally not be denied to any member of the research group in which the data were collected. If there is any possibility that a copyright or patent application might emerge from the group project, a written agreement within the group should specify the rights, if any, of each member of the group to the intellectual property. A researcher who has made a finding which may be patentable should file an Invention Disclosure with the Institute and proceed to Patent Office for registration. A principal investigator who leaves the

institute is entitled to make a copy of data to take to another institution so as to be able to continue the research or, in some cases, to take the original data, with a written agreement to make them available to the institute on request within a stated time period. Each student or other investigator in a group project should come to an understanding with the research director or principal investigator, preferably in writing, about which parts of the project he or she might continue to explore after leaving the research group. Such an understanding should specify the extent to which a copy of research data may be taken. Co-investigators at another institution are entitled to access the data which they helped to obtain. Since the scientific research may be a cooperative endeavor encompassing many persons who now or in the future might pursue related research interests, and since it is in the interest of all to rely on the contributions and findings of others, every investigator has an obligation to the general scientific community to cooperate by sharing of data. Other virtues of sharing data include the facilitation of independent confirmation or refutation of reported outcomes. It is generally accepted that the data underlying a research publication should be made available to other responsible investigators upon request after the research results have been published or accepted for publication.

4. Authorship and Other Publication Issues

Publication of research results is important as a means of communicating to the scholarly world so that readers may be informed of research results and other researchers may build on the reported findings. In fact, it is an ethical obligation for an investigator at the institute to make research findings accessible, in a manner consistent with the relevant standards of publication. The reported data and methods should be sufficiently detailed so that other researchers could attempt to replicate the results. Publication should be timely but should not be hastened unduly if premature publication involves a

risk of not subjecting all results to adequate internal confirmation or of not considering adequately all possible interpretations. A commercial sponsor of a research project may not have a veto over a decision to publish, but a delay of publication for an agreed period, not to exceed six months, may be allowed in order to permit filing of a patent application.

a. Criteria for Authorship

Since academic work is informed by a multitude of sources offering concepts and information, it is essential to emphasize rightful acknowledgement in the presentation of ideas and the publication of manuscripts. Authorship should be awarded only to those persons who have made an original and significant contribution to the conceptualisation, design, execution and interpretation of the published work. Individuals who have made smaller contributions by for instance giving advice, performing analyses or providing subject material, or who have supported the research in some other way, should also be acknowledged. The principal author should determine whether or not these individuals should be included as authors. Sometimes written permission has to be obtained for acknowledgement in the published work and even the format thereof is prescribed by the party concerned. In the case of co-authorship, questions arise as to the criteria for inclusion as author, the ability of each author to evaluate all aspects of the study and the sequence of the list of authors. Authors should discuss these questions openly and should make appointments before undertaking a co-author project. The author submitting the work, or the principal author, is responsible for coordinating the completion and submission of the work and for ensuring that all the contributions and all the collaborators are given proper acknowledgement. All authors should approve the final version of the manuscript and should be prepared to accept responsibility for the work in public. Each author or co-author is responsible

KHAMMAM - 507 002.

for the compilation, revision and verification of those parts of the manuscript, publication or presentation representing his/her contribution. All co-authors are entitled to making their own copies thereof, including figures and attached documents. In factual or scientific reports, authors should go out of their way to quote applicable data, including those data not supporting the hypothesis proposed. It is the responsibility of the author(s) to be well-informed with other appropriate publications and to quote from them. It is unethical, and harmful to the institute, to present as one's own the work of others, whether in part or in full, to fabricate research results or to omit or change information. Authors who wish to quote information obtained at a personal level or from unpublished written material should obtain written permission from the source. It is inappropriate and unacceptable to submit extracts from research, or reports on the same research, to more than one publisher, unless such action has been approved by the editors of each publication or multiple submissions is the acceptable standard practice in the specific discipline or field. In the complete report on the work in question, reference should be made to preliminary extracts from work that has already been published.

b. Order of Authors

Customs regarding the order in which co-authors' name(s) appear vary with the discipline. Whatever the discipline, it is important that all co-authors understand the basis for assigning an order of names and agree in advance to the assignments. A corresponding, or senior author (usually the first or last of the listed names in a multi-authored manuscript) should be designated for every paper, who will be responsible for communicating with the publisher or editor, for informing all co-authors of the status of review and publication, and for ensuring that all listed authors have approved the submitted version of the manuscript. This person has a greater responsibility than other co-authors to vouch for

KHAMMAM - 507 002.

the integrity of the research report and should make every effort to understand and defend every element of the reported research.

c. Self-citations

In citing one's own unpublished work, an author must be careful not to imply an unwarranted status of a manuscript. A paper should not be listed as submitted, in anticipation of expected submission. A paper should not be listed as accepted for publication or in press unless the author has received galley proof or page proof or has received a letter from an editor or publisher stating that publication has been approved, subject perhaps only to copy-editing.

d. Duplicate Publication

Researchers should not publish the same article in two different places without very good reason to do so, unless appropriate citation is made in the later publication to the earlier one, and unless the editor is explicitly informed. The same rule applies to abstracts. If there is unexplained duplication of publication without citation, sometimes referred to as self-plagiarism, a reader may be deceived as to the amount of original research data. It is improper in most fields to allow the same manuscript to be under review by more than one journal at the same time. Very often journals specify that a submitted work should not have been published or submitted for publication elsewhere, and some journals require that a submitted manuscript be accompanied by a statement to that effect. An author should not divide a research paper that is a self-contained integral whole into a number of smaller papers merely for the sake of expanding the number of items in the author's bibliography.

KHAMMAM - 507 002.

5. Conflict of Interest

Academic members of staff may not allow other professional or outside activities to distract their attention from their primary responsibilities towards the institute. They should maintain a significant and professionally acceptable presence on campus during each semester in which they are on active duty. Holidays and leave should be in accordance with the institute's regulations. They should create an atmosphere of academic freedom by promoting the open and timely disclosure of the results of their academic activities, by ensuring that their advice to students and colleagues is not influenced by personal interests, and by disclosing external activities that could affect the free flow of academic information between themselves, students and colleagues. Researchers may use institutional resources, including facilities, staff, equipment, information or confidential information as part of contract work. Researchers may not use institutional resources for any purpose other than purposes related to tuition, research or service by the institution, unless prior permission has been obtained by the head of the department and/or the Dean, as provided by the institution's regulations. Researchers should disclose in good time all potentially patentable inventions that have been discovered or created in the course and within the ambit of their service to the institution. Ownership of such inventions should be dealt with in accordance with the policy of institution. The inventors will, together with the institution, share in the benefits or royalties earned in accordance with the provisions of the institution's Intellectual Property Policy. Researchers should inform the institution whether they (or members of their families) have consultation agreements or work in an outside institution, before the following proposed arrangements or agreements between such institutions and the institution will be approved: a) gifts; b) funded projects; c) technology licensing agreements; and d) allocations.

(Affiliated to Kaloji Narayana Rao University of Health Sciences, Warangal, Telangana.)
KHAMMAM - 507 002.

In such cases formal institution permission will be required before the proposed arrangements or agreements can proceed. Institutional researchers should not allow their names to be used as “ghost” authors of manuscripts written or provided by commercial sponsors. Faculty may be allowed to engage in outside professional activities such as consulting or service on a scientific advisory board, but approval of each such activity from the Director/Dean must be obtained in advance. In no case are institutional facilities to be used in the conduct of an outside activity. Research performed for an external entity should be conducted by means of a sponsored research contract and not by way of consulting. In some schools a contract for consulting must be approved in advance, to ensure, among other things, that remuneration is related to specific services and that legitimate intellectual property rights of the institution are not compromised.

6. Obligation to Report

a. Reporting Suspected Misconduct

Reporting suspected research misconduct is a shared and serious responsibility of all members of the academic community. Any person who suspects research misconduct has an obligation to report the allegation to the Head of the department in which the suspected misconduct occurred or to the Director/Dean of Institute. Allegations are handled under procedures described in the institution's Policy. All reports are treated confidentially to the extent possible, and no adverse action will be taken, either directly or indirectly, against a person who makes such an allegation in good faith.

KHAMMAM - 507 002.

b. Correction of Errors

If a finding of error, either intentional or inadvertent, or of plagiarism should be made subsequent to publication, the investigator has an obligation to submit a correction or retraction in a form specified by the editor or publisher.

7. Responsibilities of a Research Investigator

An investigator who leads a research group has leadership and supervisory responsibilities with respect to the research performed by members of the group. A principal investigator must not only put together the research group but also arrange for the assembly of an adequate financial and administrative structure to support the research. A supervisor not only provides guidance and advice to individual members of the group in the responsible conduct of the research but also has ultimate responsibility for the scientific integrity of the whole research project. He or she should thus take all reasonable steps to check the details of experimental procedures and the validity of the data or observations reported by members of the group, including periodic reviews of primary data in addition to summary tables, graphs, and oral reports prepared by members of the group. An investigator serves not only as a research manager with respect to members of the research group but also as a mentor responsible for the intellectual and professional development of graduate/postgraduate students and junior faculty in the group, including awareness and sensitivity to issues in research ethics. A researcher should be open to collaborative work with investigators having different but complementary skills at the institution.

(Recognised by MOH & FW, Govt. of India and Dental Council of India)

(Affiliated to Kaloji Narayana Rao University of Health Sciences, Warangal, Telangana.)
KHAMMAM - 507 002.

8. Responsibilities to Funding Agencies

An investigator should be aware that the same standards of accuracy and integrity pertain to grant applications and proposals as to manuscripts submitted for publication. Reporting of results of experiments not yet performed as evidence in support of the proposed research funding, for example, is considered to be fabrication and is subject to a finding of research misconduct, even if the proposal is subsequently rejected for funding or is withdrawn before full consideration for funding is completed. The same definition of plagiarism applies to an application or proposal, including background and methodological sections, as to a publication.

An investigator must submit progress and final research reports to a sponsor at times specified in the award. He or she must authorize expenditures in a manner consistent with the approved budget and should review financial reports carefully. Investigators, who enter into agreements with commercial sponsors of research, should familiarize themselves with the special terms of such agreements, such as those, for example, concerning reporting of results, disclosure of inventions, and confidentiality. Failure to comply with the provisions might sometimes constitute a breach of contract or might compromise the institution's claims to intellectual property.

techjockey

At the outset, we would like to thank you for giving us an opportunity to be a part of your growing requirements for IT Services and Solutions.

Tech Jockey is proud to be one of the India's fastest growing IT reseller, offering end-to-end IT consulting services using the best practices in the industry. Our solutions include Software Development Services, Engineering Services, Systems Integration, ERP Solutions, Customer Relationship Management, Product Development, Electronic Commerce, Consulting & IT Outsourcing.

We are known for our outstanding customer service and are passionate about employee satisfaction. In our world no two customers are the same. Whilst the challenges faced by the customers may be comparable, the effects on their business are not. That is why it is really important to us to understand their business and how they want us to work for them.

A few highlights:

- ✓ Pan-India geographical foothold and outreach
- ✓ Multiple OEM capability
- ✓ Implementation expertise
- ✓ Capability of providing end-to-end IT solution
- ✓ Certified OEM Professionals
- ✓ Customized solutions for projects
- ✓ Maintaining SLA's (24*7 onsite support, next business day onsite support etc.) for Pan India wide prestigious projects

Our dedicated teams work closely with clients to understand their enterprise-wide services needs and provide them with skilled resources having balanced flexibility.

Partnerships with leading OEM's like Microsoft, HP, Cisco, IBM, NetApp, Oracle, Symantec, Adobe, EMC, Red Hat etc. help us offer best of breed solutions to address our customers business challenges.

We assure you of our best attention ALWAYS.

Best Regards

Team TechJockey

Term and Condition:

1. The below terms are conditions are implied to be accepted by the Buyer and Seller mutually at the time of placing the Order on website
2. Product shall mean hardware products, software licenses and / or services including cloud services and subscriptions, as the case may be, invoiced by the Seller and governed by these terms.
3. The terms herein are the binding Contract between the Seller and the Buyer. These terms shall prevail over all previous, contemporary communications exchanged between the parties, whether or not in writing including the terms and conditions of invoices under which the Products were sold to the Buyer prior to the date hereof or Buyer's Purchase order terms. Parties shall not be entitled to vary, amend, add or alter any of these conditions. This Contract shall be in addition to the terms of the Dealership Registration Form / Dealer Registration Agreement executed by the Buyer. Buyer is not an agent, contractor or representative of the Seller and this Contract is being entered as Principal dealing with Principal
4. Buyer irrevocably agrees to pay for the Products pursuant to these terms of Sale which shall be deemed conclusive on acceptance of Products by the Buyer or acceptance of these terms or acknowledgement of delivery note (including GCN or POD submitted by the Carrier) accompanying these terms by and on behalf of the Buyer
5. Each lot of Products sold under these terms shall deemed to be a separate Contract. Seller shall have the right to combine individual Contracts for the purpose of making a combined claim, if the Buyer has availed revolving credit facility from the Seller
6. Buyer shall be responsible for payment of GST and all other duties / taxes as applicable to the sale. If at any time before or after delivery to the Buyer of all or any part of the Products, any duty / tariff / tax or charge of whatsoever nature is imposed / increased by the Government of India, the State Government or any other authority or railway or shipping freight is increased with retrospective effect, then the Buyer shall be liable to reimburse the Seller the difference in the tax rate to the extent of such increase in respect of the supplies made prior to such change to the extent of the new imposition or increase thereof
7. Delay in delivery or Part Delivery of the Products shall not render the contract voidable and the Seller will not be liable for damages, compensation or otherwise on account of a delay or partial even if the Seller is advised of such possibility earlier, whether or not the time is the essence of the contract. The Buyer shall not have any right to reject the Products or withhold payment, on account of any delay

- 8. If the Buyer fails to take delivery on arrival of Product at the delivery address, the Buyer is liable to reimburse the Seller all transport, storage and other related expenses including demurrages incurred by the Seller. The Seller shall have the right to sell off / dispose of the goods at its sole discretion.
- 9. Buyer shall furnish all forms, declarations, way bill related to levy of tax, exemption, movement or otherwise, wherever applicable within the stipulated time failing which the Seller shall have the right to raise supplementary invoice for all kinds of levies / difference in levies arising therefrom.
- 10. Seller shall have a general lien on all the Products sold under these terms, whether or not the Products are in the possession of the Buyer or any third party, till such time the Seller is paid all payment due's under this contract or any other contract with the Buyer.
- 11. No credit, refund or set-off for tax and other statutory levies already collected will be allowed on rejected / returned Products unless such Products are received back by the Seller before the end of the quarter of the Sale along with original document of invoice and with the confirmation from the Buyer that no credit of tax is availed in respect of the product rejected / returned.
- 12. Sale under these terms is subject to force majeure events. The Seller shall not be liable for delay or non-delivery for reasons beyond the control of the Seller.
- 13. All payments for the Products sold must be made by the Buyer at the Seller's Registered Office at Techjockey Infotech Private Limited, Fuel Coal Depot, DDA Market Road, Sector-IV, Rama Krishna Puram, New Delhi - 110022 or existing Corporate Office. All payments made by cheques are subject to realization and if made by electronic mode (NACH etc.) payment would be subject to receipt of fund in Seller's account. Buyer irrevocably undertakes not to hold payments due to the Seller on account of a dispute between the Buyer and the manufacturer or a third party or for whatever reason. Buyer shall pay interest @ 24% per annum or the maximum interest allowed under applicable laws for payment made beyond the due date until the date of realization with applicable taxes and penalties.
- 14. All bank charges (including collection or cheque bouncing charges, return charges pursuant to dishonor of standing instructions) and stamp duty on bills of exchange, hundies wherever applicable shall be paid by the Buyer with the GST as applicable. The Seller shall not be liable for any loss or theft of bank drafts, cheques etc. in transit.
- 15. The bank receiving money against RR / LR / AWB / Bill of Lading or Products shall be deemed to be the Agent of the Buyer. Buyer's responsibility for payment is calculated from the date of invoice and shall not cease till actual payment is received by the Seller. The invoice containing acknowledgement from the Buyer / Buyer representatives of receipt of the Products or a POD submitted by the Carrier to the Seller, shall be construed as valid Proof of Delivery of Products for the purpose of payment from the Bank.
- 16. Buyer acknowledges that Products are sold AS IS received from the manufacturer or the third-party suppliers of the manufacturer. Seller does not make any representations towards warranty or fitness for particular purpose in respect of the Products sold. Buyer explicitly agrees not to hold the Seller (not being the manufacturer) responsible and liable for quality, functionality or defect in workmanship of the Products sold under these terms including intellectual property infringement claims arising out of the products. All claims of warranty / DCA should be addressed only to the manufacturer of the Products. Seller will not accept any return of Products unless agreed earlier in writing.
- 17. Seller's statement as to weight, measures, quantity and quality shall be presumed to be correct and final and their responsibility for the Products shall cease as soon as the Products are handed over to the Buyer / Buyer representatives or to the carrier appointed by the Buyer, as the case may be. The Buyer explicitly acknowledges receipt of the Products and packages in good condition and other declaration required under the applicable provisions of the Legal Metrology Act and its related Central / State Rules, as amended from time to time. No dispute regarding the quantity, quality, fitness of Products or issues relating to declarations in the packages can be raised as per the Terms & Conditions available on Techjockey.com.
- 18. Buyer undertakes not to use the Patents, Trademarks or Trade Names of the Seller or the manufacturer of the Product without the prior written consent of the Seller.
- 19. Any notice or documents shall be deemed to be validly served on the Buyer if sent by ordinary post / reputed courier to the last known address of the Buyer or the place where the Products are delivered under this Contract or to the registered email address of the Buyer.
- 20. All or any Dispute arising out of all or any terms of the Contract between the Parties herein shall be resolved through Arbitration. Either of the Party may notify the Dispute to the other party, enabling them to find an amicable settlement of the Dispute within 30 days of such notification. In the event of no amicable settlement is arrived within 30 days as stated supra, either of the party(s) shall refer the dispute to Arbitration M/s. Techjockey Infotech Private Limited, shall immediately appoint a Sole Arbitrator within one month of such reference of dispute to Arbitration M/s. Techjockey Infotech Private Limited, shall appointment of arbitrator as above. Such proceedings shall be conducted in English language only and in accordance with the provisions of The Arbitration and Conciliation Act, 1996 as amended. The finding of the Sole Arbitrator shall be final and be binding on all parties. The Venue will be as fixed by the Sole Arbitrator and the same will be binding on the parties. The Seat for the Arbitration shall be exclusively at Delhi. The governing laws shall be Indian laws and the parties explicitly agree that all or any legal proceedings in connection with the Arbitration proceedings shall be subject to the Jurisdiction of Courts in Delhi alone. The Seller shall also have the right to initiate the appropriate civil / criminal proceedings including complaint u/s 138 of NI Act, as applicable.
- 21. The Seller is registered under the MSME Act, 2006. The Buyer is liable to make payment to the seller within the period agreed by both parties. In case there is delay beyond 45 days from the date of acceptance or date of deemed acceptance, the interest payable as per Section 16 of the MSME Act, 2006 shall be 3 times the Bank Rate notified by the RBI at the time of default.
- 22. It is acknowledged and confirmed that the Seller shall have the right to transfer or assign any of its rights arising out of these terms / invoice including without limitation, the right to transfer and assign the receivables to any third party, without having to secure any consent from the Buyer.
- 23. Buyer shall ensure compliance of all applicable local laws relating to its business and storage of the Products including but not limited to environmental protection laws, e-Waste laws as well as other foreign laws applicable for the class of Products sold under these presents. Buyer shall ensure compliance of all applicable manufacturer terms with respect to the Products purchased by the Buyer. Buyer shall also ensure that the Buyer's Customers / end users comply with the above requirement. It is the responsibility of the Buyer to ascertain respective manufacturer terms on their own for the purpose of compliance and shall inform their Customers / end users of this requirement. Seller shall in no event be liable for an act of ignorance of applicable law by the Buyer or its Customers.
- 24. Buyer shall ensure that Buyer and its customers comply with all anti-corruption laws including but not limited in FCPA, UK Bribery Act, Prevention of Corruption Act, or any other manufacturer country specific Laws as applicable.
- 25. Buyer shall not, under any circumstances, use, sell or cause to sell through any third party, the Products for use in applications involving in products of weapons, hazardous, nuclear, mass destruction and/or in any unauthorized applications, within or outside India. Buyer shall not, also under any circumstances, sell or cause to sell through any third party, the Products to customers who are prohibited from receiving the Products under any applicable laws including but not limited to U.S. export regulations, etc. The Buyer shall also ensure that the Buyer's customers are kept fully informed of all such compliance requirements and make all efforts to ensure that the customers adhere to all the compliance requirements.
- 26. General: The Buyer shall ensure strict compliance of the product specific terms and conditions as published on Techjockey.com

Commitments:

1. The committee shall review and accord its approval to a biomedical research and also carry ongoing review of the study at appropriate intervals, as specified in latest edition of National ethical guidelines for biomedical and health research involving human participants – ICMR for safeguarding the rights, safety and well- being of the research participants.
2. In case of any serious adverse event occurring to research participants during the research study, the Committee shall analyze and forward its opinion as per procedures specified under National Ethical Guidelines for Biomedical and Health Research Involving Human Participants.
3. The Committee shall allow experts/officials authorized by Department of Health Research(DHR) to enter its premises to inspect any record, data or any document related to research study and provide adequate replies to any query raised by such experts/officials, as the case may be, in relation to the conduct of biomedical and health research.
4. We agree to maintain adequate and accurate after the completion or termination of biomedical & health research study for not less than 3 years from the date of completion or termination of the study (both in hard and soft copies).

Date : 28.11.2016

MINUTES OF MEETING

The Institutional Human Ethical committee meeting was held on 28th November, 2016 under the chairmanship of Dr B Anuradha, Chairperson, IEC, Mamata Dental college at council hall in Mamata Dental college.

The meeting was started by the chairman of the committee by sharp 9:30 AM. Madam had welcomed all the members of the committee.

Sl.No.	Name of faculty	Designation	Signature
1	Dr. B ANURADHA	Chair person	Anuradha
2	Dr. G VENKATESWARA RAO	Member (basic medical scientist)	G Venkateswara
3	Dr. B RAVI KUMAR	Member (basic medical scientist)	B Ravi Kumar
4	Dr. T JAYASREE	Member (basic medical scientist)	Jayasree
5	Dr. B KISHAN RAO	Member (Clinician)	B Kishan Rao
6	Dr. V NANDA GOPAL	Member (Clinician)	V. Nandagopal
7	Dr. K VINAY KUMAR REDDY	Member (Clinicians)	Vinay Kumar
8	Dr. R. ARPITA	Member secretary/Convenor	Arpita
9.	P MADHAVA RAO	Legal expert	P Madhava Rao
10.	V VENKAIAH	Social Worker Member	V Venkaiah
11.	MR. CHALASANI SRIDHAR	Lay Person	Ch. Sridhar

The presentations of dissertation synopsis held on 22nd and 23rd November, 2016 were scrutinized. All the members actively participated in evaluating and redefining the study protocols according to the ethical norms. The modification in the protocol, if any were noted and will be sent to the concerned investigators with a 2 weeks time period to re-submit their proposals.

MAMATA DENTAL COLLEGE

(Under the Management of Mamata Educational Society)

(Recognised by MOH & FW, Govt. of India and Dental Council of India)

(Affiliated to Kaloji Narayana Rao University of Health Sciences, Warangal, Telangana.)
KHAMMAM - 507 002.

After the end of all the presentations the committee had a meeting regarding how to improvise the ethical norms.

The decisions which were taken included:

1. To enlighten every staff and student about the ethical norms
2. To enhance the quality of study
3. To have more clinical trials
4. It was formulated to appoint members of ethical committee and have their duration for 2 years by Dean and Principal, Mamata Dental College.
5. Due to the covid pandemic online submissions and communications have become the norm, so all concerned are requested to regularly check their mails in order to prevent delays in communications to or among the IEC.

Date: 17.12.2016

CIRCULAR

This is to inform all the faculties and post graduates, the Institutional Ethical Committee meeting which was held on 28.11.2016 had decided that the following resubmitted research has been accepted with their modifications after careful deliberations. The committee has decided the below projects/studies are granted final approval for commencement.

SL NO	NAME OF THE PG	NAME OF THE DEPARTMENT	NAME OF THE GUIDE	TITLE OF THE THESIS	IEC NO & STATUS
1.	DR. KOTLA PRADEEPTHI	ORTHODONTIC S & DENTOFACIAL ORTHOPEDICS	DR. C. SUNITH A	THE EFFECT OF VARIOUS ANTI-OXIDANTS ON THE SHEAR BOND STRENGTH OF ORTHODONTIC BRACKETS BONDED AFTER IN-OFFICE BLEACHING – AN INVIVO STUDY.	MDC_KT_1 6200103001 D Approved
2.	DR. TOUSHITH KUMAR	ORTHODONTIC S & DENTOFACIAL ORTHOPEDICS	DR. P. KIRAN KUMAR	EN MASSE RETRACTION OF MAXILLARY ANTERIOR TEETH BY VARYING FORCE VECTOR – A FINITE ELEMENT ANALYSIS.	MDC_KT_1 6200103002 D Approved
3.	DR. B. SURENDER	ORTHODONTIC S & DENTOFACIAL ORTHOPEDICS	DR. C. SUNITH A	COMPARISON OF HAND TRACED & COMPUTERIZED POSTERO-ANTERIOR CEPHALOGRAMS FOR ACCURACY OF LANDMARK IDENTIFICATION AND REPRODUCIBILITY.	MDC_KT_1 6200103003 D Approved
4.	DR. YENDURI SWETHA	PERIODONTICS	DR. M. RAMESH BABU	EFFECT OF PERIODONTAL SURGERY ON OSTEOPROTEGRIN LEVELS IN SALIVA OF CHRONIC PERIODONTITIS PATIENTS	MDC_KT_1 6200103004 D Approved

Commitments:

1. The committee shall review and accord its approval to a biomedical research and also carry ongoing review of the study at appropriate intervals, as specified in latest edition of National ethical guidelines for biomedical and health research involving human participants – ICMR for safeguarding the rights, safety and well- being of the research participants.
2. In case of any serious adverse event occurring to research participants during the research study, the Committee shall analyze and forward its opinion as per procedures

specified under National Ethical Guidelines for Biomedical and Health Research Involving Human Participants.

3. The Committee shall allow experts/officials authorized by Department of Health Research(DHR) to enter its premises to inspect any record, data or any document related to research study and provide adequate replies to any query raised by such experts/officials, as the case may be, in relation to the conduct of biomedical and health research.
4. We agree to maintain adequate and accurate after the completion or termination of biomedical & health research study for not less than 3 years from the date of completion or termination of the study (both in hard and soft copies).

Greetings from Institutional Ethics Committee,

Research proposals are invited from all the faculties, PG & UG students for initial approval from ethical committee of our college for the November-December 2017 session. Those who are planning for their minor and major research projects are requested to submit the research proposals in the prescribed format given below. The application should be send to "The Member Secretary, EC- secretariat, Mamata Dental College" both in hard and soft copy within 15 days of this notification

The date and place of the meeting, the Rules and Regulations of conduct of meeting will notify later.

study protocols according to the ethical norms. The modification in the protocol , if any were noted and will be sent to the concerned investigators with a 2 weeks time period to re-submit their proposals.

After the end of all the presentations the committee had a meeting regarding how to improvise the ethical norms.

The decisions which were taken included:

1. To emphasis on informed consent
2. To have stricter ethical norms for in vivo and in vitro study also
3. To overview all the studies to check if they are abiding by ethical norms
4. To appoint a new set of committee members for next sessions

Commitments:

1. The committee shall review and accord its approval to a biomedical research and also carry ongoing review of the study at appropriate intervals, as specified in latest edition of National ethical guidelines for biomedical and health research involving human participants – ICMR for safeguarding the rights, safety and well- being of the research participants.
2. In case of any serious adverse event occurring to research participants during the research study, the Committee shall analyze and forward its opinion as per procedures

specified under National Ethical Guidelines for Biomedical and Health Research Involving Human Participants.

3. The Committee shall allow experts/officials authorized by Department of Health Research(DHR) to enter its premises to inspect any record, data or any document related to research study and provide adequate replies to any query raised by such experts/officials, as the case may be, in relation to the conduct of biomedical and health research.
4. We agree to maintain adequate and accurate after the completion or termination of biomedical & health research study for not less than 3 years from the date of completion or termination of the study (both in hard and soft copies).

Date : 29.09.2018

Greetings from Institutional Ethics Committee,

Research proposals are invited from all the faculties, PG & UG students for initial approval from ethical committee of our college for the November-December 2018 session. Those who are planning for their minor and major research projects are requested to submit the research proposals in the prescribed format given below. The application should be send to "The Member Secretary, EC- secretariat, Mamata Dental College" both in hard and soft copy within 15 days of this notification

The date and place of the meeting, the Rules and Regulations of conduct of meeting will notify later.

MINUTES OF MEETING

The Institutional Human Ethical committee meeting was held on 29th October, 2018 under the chairmanship of Dr B Anuradha, Chairperson, IEC, Mamata Dental college at council hall in Mamata Dental college.

The meeting was started by the chairman of the committee by sharp 9:30 AM. Madam had welcomed all the members of the committee.

Sl.No.	Name of faculty	Designation	Signatures
1	Dr. B ANURADHA	Chair person	
2	Dr. G VENKATESWARA RAO	Member (basic medical scientist)	
3	DR. B NAVEEN KUMAR	Member (basic medical scientist)	
4	DR. M MADHULATHA	Member (basic medical scientist)	
5	Dr. B KISHAN RAO	Member (Clinician)	
6	Dr. C S SOONU	Member (Clinician)	
7	Dr. M SUJESH	Member (Clinicians)	
8	Dr. R ARPITA	Member secretary/Convenor	
9.	MADHAVA RAO	Legal expert	
10.	V. VENKAI AH	Social Worker Member	
11.	MR. CHALASANI SRIDHAR	Lay Person	

The presentations of dissertation synopsis held on 23rd and 24th October, 2018 were scrutinized. All the members actively participated in evaluating and redefining the study protocols according to the ethical norms. The modification in the protocol , if

any were noted and will be sent to the concerned investigators with a 2 weeks time period to re-submit their proposals.

After the end of all the presentations the committee had a meeting regarding how to improve the ethical norms.

The decisions which were taken included:

1. To oversee the projects at regular interval
2. Short term studies were also emphasised to register with the ethical committee.
3. To emphasize the need for power analysis and pilot trials for improving the quality of research conducted.
4. To encourage more publications in indexed journals

Commitments:

1. The committee shall review and accord its approval to a biomedical research and also carry ongoing review of the study at appropriate intervals, as specified in latest edition of National ethical guidelines for biomedical and health research involving human participants – ICMR for safeguarding the rights, safety and well- being of the research participants.
2. In case of any serious adverse event occurring to research participants during the research study, the Committee shall analyze and forward its opinion as per procedures specified under National Ethical Guidelines for Biomedical and Health Research Involving Human Participants.

3. The Committee shall allow experts/officials authorized by Department of Health Research(DHR) to enter its premises to inspect any record, data or any document related to research study and provide adequate replies to any query raised by such experts/officials, as the case may be, in relation to the conduct of biomedical and health research.
4. We agree to maintain adequate and accurate after the completion or termination of biomedical & health research study for not less than 3 years from the date of completion or termination of the study (both in hard and soft copies).

Date: 30.09.2019

Greetings from Institutional Ethics Committee,

Research proposals are invited from all the faculties, PG & UG students for initial approval from ethical committee of our college for the November-December 2019 session. Those who are planning for their minor and major research projects are requested to submit the research proposals in the prescribed format given below. The application should be send to "The Member Secretary, EC- secretariat, Mamata Dental College" both in hard and soft copy within 15 days of this notification

The date and place of the meeting, the Rules and Regulations of conduct of meeting will notify later.

MINUTES OF MEETING

The Institutional Human Ethical committee meeting was held on 28th October, 2019 under the chairmanship of Dr B Anuradha, Chairperson, IEC, Mamata Dental college at council hall in Mamata Dental college.

The meeting was started by the chairman of the committee by sharp 9:30 AM. Madam had welcomed all the members of the committee. Because of the covid pandemic, the meeting was conducted as a zoom interface virtually.

Sl.No.	Name of faculty	Designation	Signatures

KHAMMAM - 507 002.

The presentations of dissertation synopsis held on 22nd and 23rd October, 2019 were scrutinized. All the members actively participated in evaluating and redefining the study protocols according to the ethical norms. The modification in the protocol, if any were noted and will be sent to the concerned investigators with a 2 weeks time period to re-submit their proposals.

After the end of all the presentations the committee had a meeting regarding how to improvise the ethical norms.

The decisions which were taken included:

1. To update the IEC if the study has extended beyond the requested time period.
2. If the sample size has been modified due to patient drop outs it should be informed to the committee
3. Any severe adverse reactions reported during the study needs to be reported to the committee.

With a thank you note from the chairman the committee ended their session.

Commitments:

1. The committee shall review and accord its approval to a biomedical research and also carry ongoing review of the study at appropriate intervals, as specified in latest edition of National ethical guidelines for biomedical and health research involving human participants – ICMR for safeguarding the rights, safety and well- being of the research participants.
2. In case of any serious adverse event occurring to research participants during the research study, the Committee shall analyze and forward its opinion as per procedures specified under National Ethical Guidelines for Biomedical and Health Research Involving Human Participants.
3. The Committee shall allow experts/officials authorized by Department of Health Research(DHR) to enter its premises to inspect any record, data or any document related to research study and provide adequate replies to any query raised by such

experts/officials, as the case may be, in relation to the conduct of biomedical and health research.

4. We agree to maintain adequate and accurate after the completion or termination of biomedical & health research study for not less than 3 years from the date of completion or termination of the study (both in hard and soft copies).

Date : 30.10.2020

Greetings from Institutional Ethics Committee,

Research proposals are invited from all the faculties, PG & UG students for initial approval from ethical committee of our college for the November-December 2020 session. Those who are planning for their minor and major research projects are requested to submit the research proposals in the prescribed format given below. The application should be send to "The Member Secretary, EC- secretariat, Mamata Dental College" both in hard and soft copy within 15 days of this notification

The date and place of the meeting, the Rules and Regulations of conduct of meeting will notify later.

MINUTES OF MEETING

The Institutional Human Ethical committee meeting was held on 1st December, 2020 under the chairmanship of Dr B Anuradha, Chairperson, IEC, Mamata Dental college at council hall in Mamata Dental college following COVID protocol norms.

The meeting was started by the chairman of the committee by sharp 9:30 AM. Madam had welcomed all the members of the committee. Because of the covid pandemic, the meeting was conducted as a zoom interface virtually.

Sl.No.	Name of faculty	Designation	Signature
1	Dr. B ANURADHA	Chair person	
2	Dr. G VENKATESWARA RAO	Member (basic medical scientist)	
3	Dr. M MADHULATHA	Member (basic medical scientist)	
4	Dr ANIL NAMOSH	Member (basic medical scientist)	
5	Dr. B KISHAN RAO	Member (Clinician)	
6	Dr. R NAVEEN	Member (Clinician)	
7.	DR.K SUNITHA	Member(Clinicians)	
8	Dr. R ARPITA	Member secretary/Convenor	
9	MADHAVA RAO	Legal expert	
10	V. VENKAIAH	Social Worker Member	
11	MR. CHALASANI SRIDHAR	Lay person	

The presentations of dissertation synopsis held on 25th and 26th November, 2020 were scrutinized. All the members actively participated in evaluating and

redefining the study protocols according to the ethical norms. The modification in the protocol, if any were noted and will be sent to the concerned investigators with a 2 weeks time period to re-submit their proposals.

Along with ethical guidelines emphasis was also made on COVID appropriate protocols including the use of PPE kits, a declaration regarding their health status where made mandatory.

Zoom calls to the patients where ever possible was advised during their recall visits. Thus, reducing the number of visits.

After the end of all the presentations the committee had a meeting regarding how to improve the ethical norms.

The decisions which were taken included:

1. To emphasize on the guidelines to conduct the research activity
2. To conduct a pilot study and the report to be submitted to the committee if it's a human clinical trial.
3. Periodical Review needs to be carried out on the quality of research during the study period.

With a thank you note from the chairman the committee ended their session.

Commitments:

1. The committee shall review and accord its approval to a biomedical research and also carry ongoing review of the study at appropriate intervals, as specified in latest edition of National ethical guidelines for biomedical and health research involving human participants – ICMR for safeguarding the rights, safety and well- being of the research participants.
2. In case of any serious adverse event occurring to research participants during the research study, the Committee shall analyze and forward its opinion as per procedures specified under National Ethical Guidelines for Biomedical and Health Research Involving Human Participants.
3. The Committee shall allow experts/officials authorized by Department of Health Research(DHR) to enter its premises to inspect any record, data or any document related to research study and provide adequate replies to any query raised by such experts/officials, as the case may be, in relation to the conduct of biomedical and health research.

4. We agree to maintain adequate and accurate after the completion or termination of biomedical & health research study for not less than 3 years from the date of completion or termination of the study (both in hard and soft copies).
